

C++ Is A Powerful General-purpose Programming Language. Our C++ Programming Tutorial Will Guide You To Learn C++ Programming One Step At A Time With The Help Of Examples.

C++ Program To Add Two Numbers

```
1  #include <iostream>
2  using namespace std;
3
4  int main()
5  {
6      int num1, num2, sum;
7
8      cout << "Enter two integers: ";
9      cin >> num1 >> num2;
10
11     sum = num1 + num2;
12
13     cout << num1 << " + " << num2 << " = " << sum;
14
15     return 0;
16 }
```

C++ Program To Print Number Entered By User

```
1  #include <iostream>
2  using namespace std;
3
4  int main()
5  {
6      int number;
7
8      cout << "Enter an integer: ";
9      cin >> number;
10
11     cout << "You entered " << number;
12
13     return 0;
14 }
```

C++ Program To Swap Two Numbers

```
1  #include <iostream>
2  using namespace std;
3
4  int main()
5  {
6      int a = 5, b = 10, temp;
7
8      cout << "Before swapping." << endl;
9      cout << "a = " << a << ", b = " << b << endl;
10
11     temp = a;
```

```
12     a = b;  
13     b = temp;  
14  
15     cout << "\nAfter swapping." << endl;  
16     cout << "a = " << a << ", b = " << b << endl;  
17  
18     return 0;  
19 }
```
